SALMA SALAH ELDIN ALLAWA

+20 102 510 9119 | salma.salah182001@gmail.com | LinkedIn | GitHub | Hadayk October City, Giza, Egypt

PROFESSIONAL SUMMARY

.NET developer with a solid computer science background and practical experience building web apps and REST APIs. I work primarily with C#, ASP.NET Core, EF Core, and SQL Server, with hands-on experience in MVC and Web API patterns-implementing authentication, authorization, caching, and database design. I enjoy writing clean, efficient code that solves actual problems and keeps applications running smoothly, and is built to scale and support business growth.

EDUCATION

Bachelor's Degree in Computer Science and Artificial Intelligence | September 2023 – Expected Graduation 2027
Fayoum University | Fayoum, Egypt | GPA: 3.94 / 4.0

TECHNICAL SKILLS

Backend: C#, ASP.NET Core (MVC & Web API), Entity Framework Core, LINQ, JWT Authentication, Cookie Authentication

Frontend: HTML, CSS, JavaScript, Bootstrap

Database & Caching: SQL Server, Redis, Caching Strategies

Architecture & Principles: N-Tier Architecture, Onion Architecture, RESTful API Design, OOP, SOLID Principles

Tools: Git, GitHub, Swagger / OpenAPI, Postman

Other: C++ (OOP), Python Basics

EXPERIENCE

Teacher's Assistant | October 2024 – February 2025

- Assisted lead teacher in classroom management and lesson preparation.
- Supported students with understanding course material and completing assignments.

PROJECTS

Bookify Hotel System | ASP.NET Core Web API | Team Project | DEPI Initiative

- Built a hotel booking and management system using ASP.NET Core Web API, Entity Framework Core, and SQL Server, following N-Tier Architecture.
- Implemented and contributed to JWT Authentication, role-based authorization, booking workflows, room management, and reservation validation.
- Documented and tested API endpoints using Swagger / OpenAPI.

E-Commerce System | ASP.NET Core Web API | Route Academy Course Project

- Developed a RESTful E-Commerce API using ASP.NET Core Web API and Entity Framework Core, following Onion Architecture and working with SQL Server and a second database.
- Built modules for products, categories, shopping cart, and order processing, with JWT Authentication and Stripe Payment Gateway integration.
- Integrated Redis Caching to improve performance and documented/tested APIs using Swagger and Postman.

Gym System | ASP.NET Core MVC Web Application | Route Academy Course Project

- Developed a Gym Management System using ASP.NET Core MVC, Entity Framework Core, and SQL Server, following N-Tier Architecture.
- Implemented Cookie-based Authentication and an admin dashboard for managing members, trainers, and subscription plans.

CERTIFICATIONS

Route Academy Backend .NET | Route Academy | December 2025 – July 2026

- Intensive Backend .NET training covering ASP.NET Core MVC, Web API, EF Core, Dependency Injection, Repository Pattern, and API Security.

Digital Egypt Pioneer Program (DEPI) Full Stack | Digital Egypt Pioneer Program | June – December 2025

- Completed a government-backed intensive Full Stack .NET Web Developer track focused on practical software development skills, culminating in the Bookify Hotel System team project.

English for IT 1 | Cisco Networking Academy | April 2025

- Developed professional English communication skills in IT contexts, including technical documentation and terminology.

LANGUAGES

Arabic (Native) | English (Fluent) | German (Basic)
